EXPERIENCE

Digital Marketing Intern; Reclaimed Colors & TeleMed | Acadium |

New York, New York | October 2024- Present

- Designed and implemented website marketing strategies, optimizing user experience and driving traffic through content updates and on-page SEO techniques.
- Developed and executed email marketing campaigns, including copywriting, segmentation, and performance analysis, improving open and click-through rates.
- Created and managed social media content across platforms, increasing engagement and follower growth by leveraging analytics and aligning with brand voice.
- Crafted persuasive and targeted ad copy for a nail fungus clinic research initiative, successfully attracting participants for interviews to support valuable data collection and insights.
- Conducted market research and competitor analysis to inform marketing strategies and identify growth opportunities.

Program Success Management Intern; City Tutors

New York, New York | August 2024- Present

- Supported program operations by maintaining accurate records and managing databases to monitor participant engagement and outcomes.
- Responded to participant inquiries, offering guidance and support to enhance their experience and outcomes.
- Maintained and updated spreadsheets and databases to track mentors, mentees, tutors, and tutees, ensuring accurate and organized records.
- Matched mentors with mentees and tutors with tutees based on skills, goals, and availability to foster effective learning relationships.
- Responded promptly to emails and inquiries from participants, providing guidance and resolving issues to ensure smooth program operations.
- Sent notifications and reminders to mentors, mentees, tutors, and tutees, keeping them informed of schedules, updates, and program events.
- Supported program communication efforts by drafting and sending clear, professional correspondence to stakeholders.

Scrum Master; P1Games

New York, New York | June 2024- Present

- Facilitated Agile ceremonies, including daily stand-ups, sprint planning, retrospectives, and reviews, to ensure efficient team collaboration and alignment.
- Removed impediments and roadblocks, enabling the team to maintain productivity and focus on sprint goals.
- Monitored sprint progress using tools like Jira, generating reports to track team velocity, burn-down charts, and project status.
- Supported the team in achieving deliverables on time while maintaining a high standard of quality and adhering to project timelines.
- Drove team accountability by facilitating constructive feedback loops and implementing process improvements based on retrospective insights.
- Managed stakeholder expectations by providing regular updates on project milestones, risks, and resolutions.

Software Engineer; WEIGHT WATCHERS

New York, New York | Sep 2021- Jan 2024

- Led and executed an accessibility project for the shop site, improving user experience by adhering to WCAG guidelines to ensure content is accessible to users with disabilities.
- Monitored project progress, identified and resolved issues, and provided regular updates to leadership and stakeholders. This ensured timely project completion and facilitated meeting deadlines, often ahead of schedule.
- Facilitated team meetings, including daily stand-ups, sprint planning, and sprint reviews, to ensure effective collaboration and communication.
- Collaborated with cross-functional teams to define project scope, goals, and deliverables for various projects, including shop redesign, updating checkout with new features, implementing self-cancellation, integrating Recurly, and adding cancellation features to account settings, ensuring alignment with business objectives.
- Implemented new technologies like Recurly and contributed to innovative projects leveraging internal tools and coding skill sets to drive business growth and improve customer experience.
- Demonstrated ability to work independently and as part of a collaborative team to address technical challenges and achieve project milestones.
- Created detailed technical documentation for other developers in team and admin audiences, including statements of work, integration documentation, flow charts, and diagrams.
- Tracked and resolved complex technical issues post-implementation and issues that came up during implementation, ensuring a seamless user experience.
